

# MODEL HF-3150-S

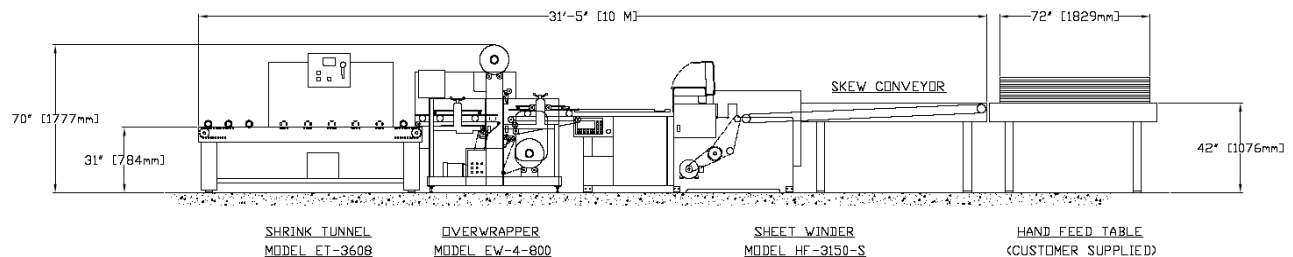

## HAND FED SHEET TO ROLL WINDER

(for Posters, Calendars and Giftwrap)

### Features:

- Includes skew type in-feed conveyor with nip roll drive to automatically “square” the poster as it is fed into the machine. The operator simply inserts a poster from a stack of posters and the machine will automatically square it when conveying through machine
- Customer must provide a table or surface from which the machine operator takes posters or sheets from the top and safely feeds the posters or sheets into the machine
- In-feed is safely guarded to prevent injury to the machine operator
- Production speeds dependant on operator dexterity
- Interchangeable rolling head for different inside roll diameters
- Ability to feed 2 or 3 sheets with options for Gift Wrap sheets
- Line may be optionally equipped with automatic shrink film roll overwrapping for complete roll packaging system
- Ability to add end seal option to overwrapper for totally enclosed overwrap package
- Automatic end labeler optionally available to apply self adhesive end label around roll circumference upon exit from heat shrink tunnel
- Automatic end labeler optionally available to apply die cut self adhesive label on one or both ends of the poster
