

**ELSNER ENGINEERING WORKS, INC.**

475 FAME AVE., P.O. BOX 66, HANOVER, PA 17331, U.S.A.

## *Elsner RMW Style Rolled Border Production Line*

- Consists of Elsner Model RMW-30P Perforator/Rewinder to perforate standard width rolls of wallpaper into border sizes 4.0" to 7.0" as standard. Wound rolls are automatically processed through an Elsner Model 1150 border roll processor for automatic label closure and break-off into individual rolls for overwrapping. Rolls are then conveyed automatically into the Elsner Model OW-18-2C overwrapper where two (2) border rolls are overwrapped and then shrunk concurrently;
- Machine allows for production of sidewall rolls, as well, when equipped with options.

We will be happy to discuss pricing and answer any questions you may have after your review of this literature. Elsner equipment is used throughout the wallcoverings industry worldwide to provide versatility and the quality products for which your industry demands.

Thank you for your interest. We look forward to working with you in the future and to providing you with the dependable and reliable equipment for which Elsner has become known. Please do not hesitate to contact your Elsner sales engineer or representative with your further questions or as your further interest develops.

**ELSNER—a name you have come to know and trust in the wallcoverings industry!**
