

**T**he Model SRW-500 Short Roll Coreless Rewinder from Elsner is designed specifically for high-speed converting of book cover

materials. It handles both adhesive-backed plastics (with release sheet) and nonadhesive plastics, as well as other film and vinyl web products.

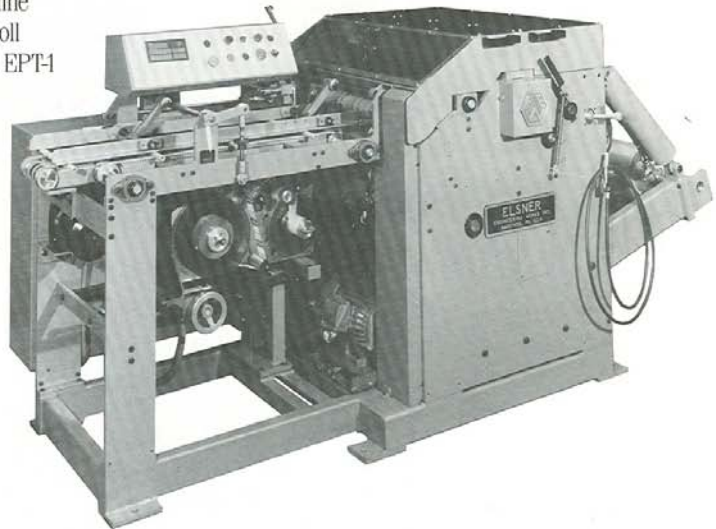

## High-Speed Book Cover Rewinding

# ELSNER SRW-500 SHORT ROLL CORELESS REWINDER

Rewind your book cover materials at speeds up to 80 rolls per minute for 40 in (1 m) cut lengths and 60 rolls for 80 in (2 m) cut lengths. The maximum web speed is 328 ft per minute (100 m/minute).

This high-speed machine includes automatic label roll closure, the Elsner Model EPT-1 Automatic Tension Control unit, state-of-the-art programmable logic control electronics, digital cut-length control adjustment in centimeter or inch increments, a built-in off-the-floor mill roll-lift system, and a shear-cut rotary knife with tangent start.

You also receive traditional Elsner quality, reliability, and service—including a full supply of spare parts in a large, ready-to-ship inventory.
