Elsner builds line for Crepe Paper Streamer Rolls

For Immediate Release – Elsner continues to strengthen its role in the Party Goods market with the recent design upgrade and build of a converting line for producing crepe paper streamer rolls. The featured component of the line is the ELSNER Model LS-MS-15 Fully Automatic Log Roll Splitter.

The ELSNER Model LS-MS-15 Fully Automatic Log Roll Splitter is designed to be coupled directly with an ELSNER Rewinder. It can be optionally hand fed for off-line

utilization as well. The machine handles unclosed rolls up to 5-1/2" (140 mm) diameter. Hot-melt glue is used to hold the roll closed. The multi-blade cutting unit processes the log into pre-determined finished widths (1.75" to 2.75" finished products from 20" to 30" logs). Elsner also updated the operator interface to ease use of the machine.

The complete line consists of the ELSNER Model LS-MS-15 Fully Automatic Log Roll Splitter coupled to the popular ELSNER Model V-5-30 Fully Automatic Rewinder. The Rewinder is equipped with a dual cantilevered unwind designed specifically for this type of product for quick mill roll changes.

As with all their recent machine builds Elsner incorporated features geared towards the ideals of World Class Manufacturing into this project. Elsner strives to provide machinery that serves its overall function while simplifying operating and maintenance practices. With this line, features such as color-coded adjustment fasteners, green operation zone on air gauges, adjustment and position scales and even a modem in the electrical cabinet for remote assistance were incorporated.

F. Rusty Elsner, President and CEO, states; 'One of the best parts of my career is that each day presents a different opportunity. We've built over 400 models of machines over the years and it certainly keeps life interesting when we can offer to solve the needs of customers across such a broad range.' At any one time Elsner can have machines or parts in progress for the party goods, kitchen rolled products, wallpaper, non-wovens and specialty converting markets. 'It's this range,' says Elsner 'that keeps us busy when others are looking for projects'.

Founded in 1934, Elsner Engineering Works, Inc. designs and manufactures converting and packaging machinery. They celebrated their 75th anniversary as a family owned and operated

business in 2009. Their line of over 40 different machines are used to convert and package such products as disposable disinfectant baby non-woven wipes, gift wrap paper, aluminum foil and wallpaper. Elsner currently services and supports over 2400 machines worldwide with equipment in service in nearly 60 countries. Besides their headquarters in Hanover, PA, they have a sales office in Bremen, Germany, and offer field support from sites in the United Kingdom and Shanghai, China.
